BROWN JORDAN

EDGE COLLECTION

MARIA ALEJANDRA **ICAZA PAREDES**

PROJECT BRIEF

Design a collection of seating using thermally modified timber as the dominant material. the collection must fit within the established Brown Jordan values while expanding into this new material. the collection can include dining, lounge, statement pieces such as day beds or chaise lounges, or other pieces as deemed important.

TMT is domestically sourced, sustainably harvested wood that is kiln dried and then thermally modified to broaden its lifespan in outdoor environments similar to exotic hardwoods.
